Clinical Research Advancement is committed to Advancing Healthcare by focusing on Effective Recruitment and Retention Strategies.

Our team of experienced Clinical Research professionals offer a first-in-class approach to recruitment and retention strategies.

Our vision is to be a leader in accelerating clinical research initiatives by providing comprehensive and accurate clinical research services with a focus on inclusivity to identify and engage potentially eligible subjects for clinical trials.

We aim to bring life-changing therapies to our global community through novel and cutting-edge clinical research and to assist pharmaceutical companies in developing new medications and new indications for existing medications for a variety of disorders over a wide spectrum of clinical areas.

We aim to be a trusted partner to our clients and partners by delivering unique and bespoke solutions to transform and positively impact clinical research initiatives globally.

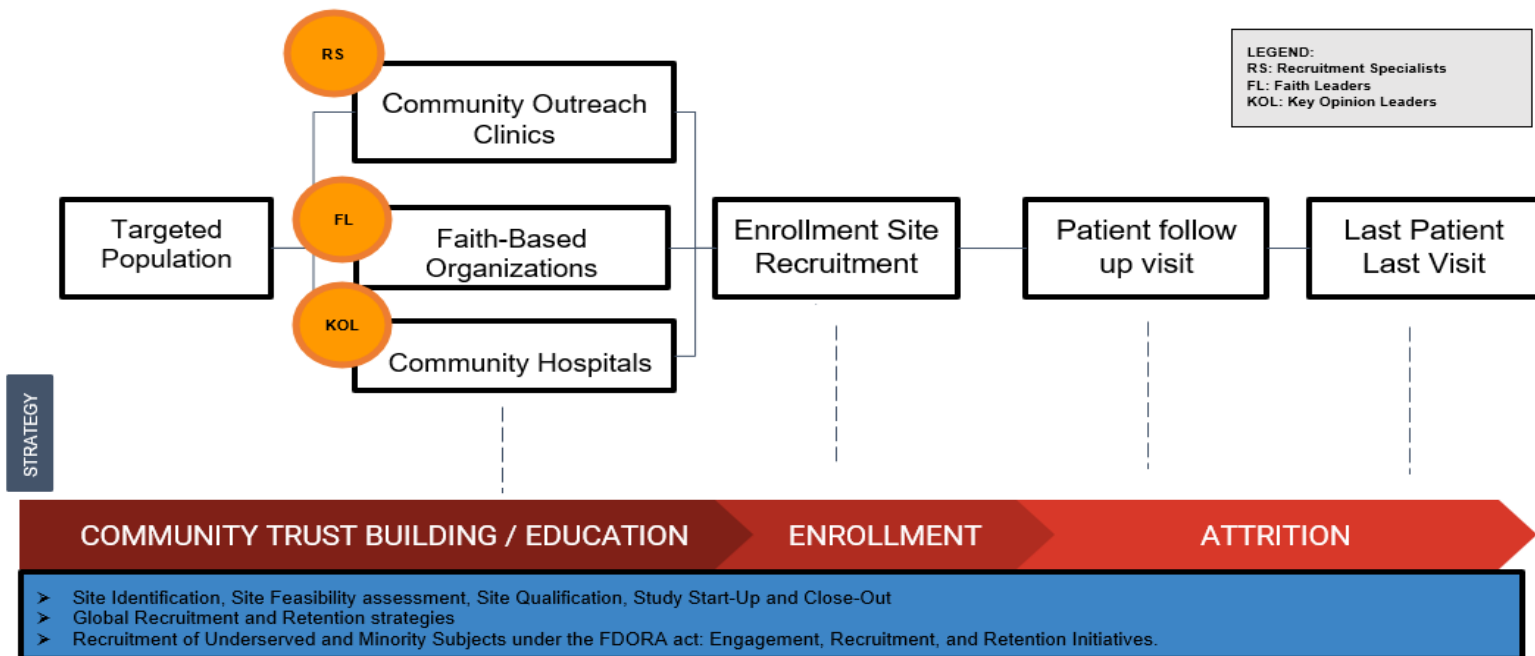

Our expertise in clinical recruitment, retention and Decentralized trial strategies spans multiple therapeutic indications, we specialize in Oncology, Respiratory, Cardiovascular, Endocrinology, Infectious, and Rare diseases to name a few.

OUR APPROACH

The success of every study is linked to efficiently selecting, recruiting and retaining subjects within a reasonable timeframe.

The Clinical Research Advancement Recruitment and Retention Model

We are experts in Site Identification, Key Opinion Leader (KOL) Development and Access Stakeholder Mapping

KOLs, HCPs and Access stakeholders play a critical role in the success of clinical trials

- › Clinical Research Advancement has engaged young attendings and HCPs in developing KOLs and advisors for over 20 years across multiple regions.
- › We utilize a data-driven approach to identify Clinical sites, KOLs and HCPs who are most relevant to our disease areas and patient populations.
- › For each Key stakeholder, we develop tailored engagement plans for each KOL and HCP based on their specific area of expertise, publications, and focus areas.

Clinical Research Advancement focuses on the successful execution and delivery of Clinical Trial Services.

We take pride in our tried, tested and successful approach to clinical operations with a focus on recruitment and retention

We are passionate about accelerating discoveries from the laboratory to the patient.

We Value Quality, Speed, Transparency and Integrity. We strive to provide high-quality clinical trial management services to our clients and partners with a focus on cost-effectiveness, speed and the highest standards of quality.

The thoughtful selection and recruitment of subjects streamline the research process and contributes significantly to the quality and comprehensiveness of the trials results.

Clinical Research Advancement consists of specialty teams that average decades of clinical trial experience. The team consists of clinicians, clinical research associates, study coordinators, recruitment and retention specialists, Decentralized trial/home health service specialists, health economics and outcome research (HEOR) and Regulatory affairs specialists.

Our team has extensive experience with Global Regulatory requirements as we believe in upholding the highest standards of quality and ethical conduct in each project that we undertake.

GLOBAL SERVICES

We are your full-service Clinical resource.

Whether you need full-service clinical trial support, functional support or individual resources we are here to support your clinical trial goals.

Our objective is to develop collaborative partnerships to provide support across Global clinical development programs.

PHASES OF RESEARCH

Early Phase

Early development is different: fast-moving, adaptive and complex. Clinical Research Advancement has the expertise and proven ability to meet your needs.

We recognize that early phase studies need scalable solutions to maximize efficiency while supporting critical study goals such as dose-finding and signal detection.

Our experienced team will work closely with you to design an approach that best fits the needs of your organization.

> Nimble

We provide the services that you need in a flexible model with processes and resources fit for purpose with the flexibility to adapt quickly.

> Cost-effective

We assist to scale your trial costs appropriately from resource allocation to identifying phase appropriate services to fit both your budget and strategic objectives.

> Strategic

The complexities of early-phase research requires a project team with strategic thinkers in each role. Our teams are experts at designing and executing dose-escalation, randomized and decentralized trial designs.

Late Phase

Late phase clinical trials require the translation of lessons learned from earlier trials into plans and processes that can be scaled effectively.

Our model brings together Global and regional expertise to enable strategy and execution that results in measurable improvement to enrollment and data deliverables.

The successful execution and delivery of clinical trial services relies heavily on effective recruitment and retention strategies and Clinical Research Advancement offers a comprehensive solution.

> Proactive Study Management

Clinical experts who understand the big picture, exemplify active vs. passive management and adds value.

> Strong Site Relationships

Professionally mature, experienced clinical research associates, clinical project managers and data scientists with decades of experience and established site relationships.

> Fast & Clean Data

Effective patient recruitment and retention are essential for obtaining statistically significant results and high-quality data.

Our Ethos

At the heart of our organization lies a steadfast commitment to advancing clinical research. We utilize an evidence-based approach to optimize recruitment and retention.

Empowering Participation

Inclusive clinical research is the foundation for the future of research. By amplifying the experiences of diverse participants, we strive to transform the landscape of clinical research.

We are experts in Clinical Recruitment & Retention Strategies, Site Identification & Feasibility, Qualification Assessments and Key Opinion Leader (KOL) Development

We have a proven track record of cultivating strong relationships with key opinion leaders and clinical sites.

We believe that we can dramatically accelerate the availability of new discoveries and treatments

We believe that innovations today lead to better treatments that can help save lives tomorrow and we are committed to supporting the most ambitious clinical research initiatives while maintaining scientific, compliance and ethical standards and integrity. Leveraging the latest advancements in digital health and remote technologies we have pioneered a decentralized approach to clinical trials.

LEADERSHIP

Clinical Research Advancement was founded in 2010 and has grown exponentially into a full-service Global Clinical Research Organization.

Patient and Client-Focused Subject Matter Experts

Clinical Research Advancement has over 25 years of clinical research expertise and has provided support for over 60 clients/sponsors and over 200 Clinical projects globally.

Transparency and open communication are the cornerstone of our recruitment and retention strategies and are designed to actively engage multicultural communities. Our Decentralized approach to clinical trials, brings the clinical trial experience directly to patients, while prioritizing their comfort and convenience.

Clinical Research Advancement was founded by a team of clinicians with expertise in global research, drug development and International business strategy . The CRA team has proven expertise in accelerating drug development and improving clinical trial efficiency.
